

Moloto Road (R573) Upgrading: **RPF 07 NOVEMBER 2016**

Crash Data Analysis Mpumalanga and Limpopo

Background – Problem Statement

What makes this route different / “hazardous” ?

- Links 33 informal settlements and townships
- Serves as a primary mobility route
 - Distinct travel patterns, under dark conditions
- Also serves an accessibility function
 - High numbers of pedestrian activity
 - Land use development not controlled, many unplanned (unlawful) accesses
- Design standards inconsistent, little regard for road safety
- Trading in the road reserve
- Road user behaviour issues
 - Driving in face of oncoming traffic
 - Illegal U-Turns, speeding
- Lack of basic road maintenance, edge breaks, lighting, etc.

Background – Problem Statement (cont.)

■ Vehicles

- Between 10 000 and 12 000 vpd (Gauteng and Mpumalanga Section)
- Drops down to approx. 4 000 vpd (Limpopo section)
- High percentages of buses in the peaks

■ Pedestrian activity

- Pedestrian count at five busiest points at urban areas
- Many of whom are crossing and travelling in **the dark**

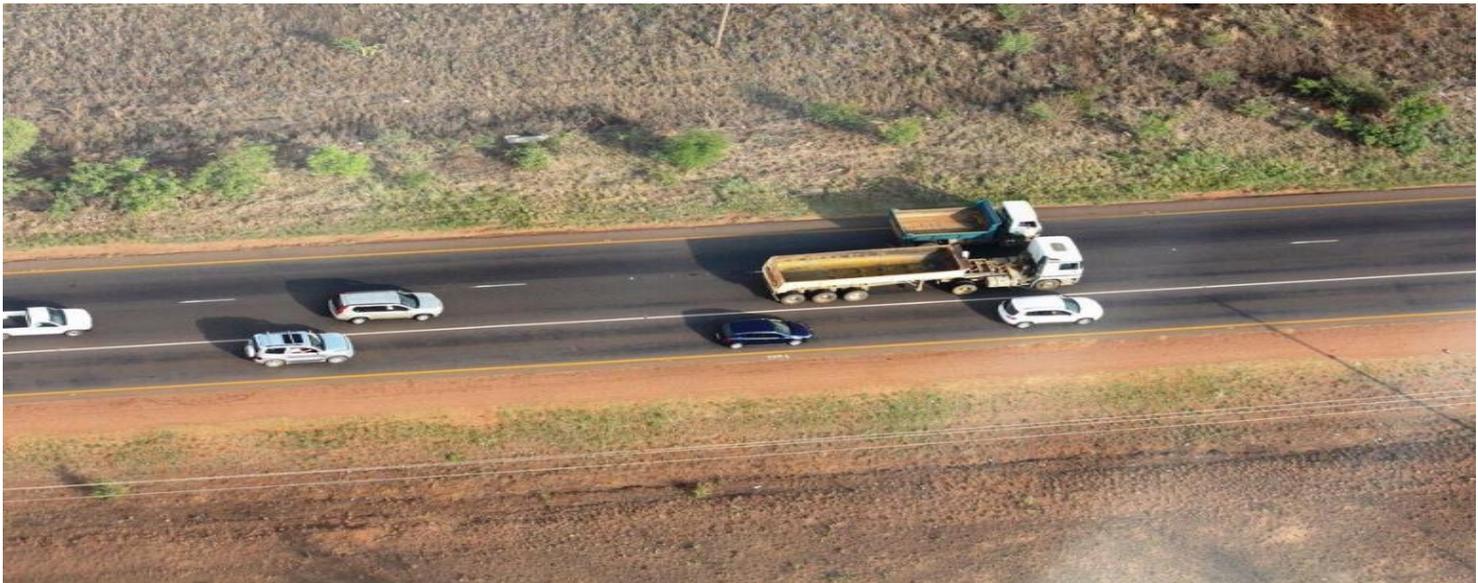

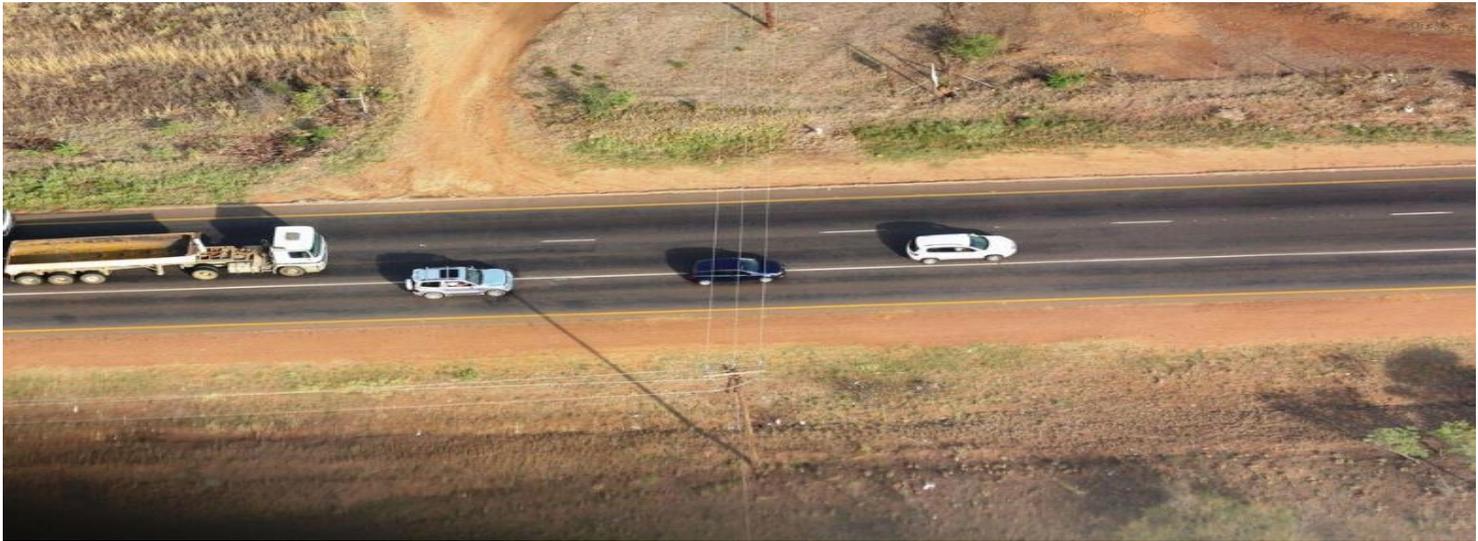

Minor intersections

Major intersections

Challenges - Illegal Passing

Challenges - Informal Accesses

Challenges – Informal traders

Challenges - Social

- High employment rate
- Stakeholder engagement
 - Politicians
 - Presidency, Cabinet, PICC
 - National departments (Treasury, DOT, DEA, DWS, DMR)
 - Provincial departments
 - Local municipalities
 - Local communities
 - Small businesses
 - Community organizations
 - Construction industry
 - Taxi industry, Bus Operators

Moloto Road Upgrade - The Rationale

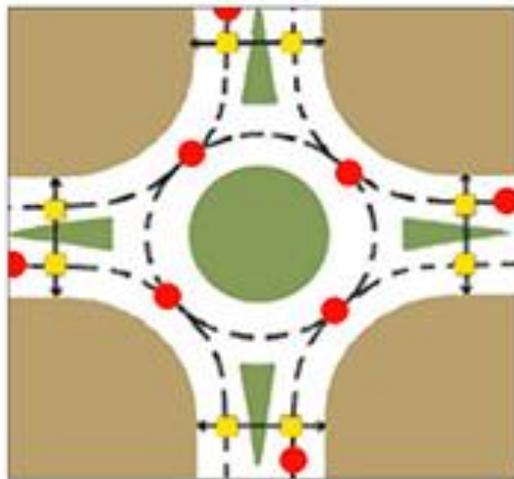

- **Runs through 3 provinces: Gauteng, Limpopo & Mpumalanga;**
- **Used by approximately 150 000 commuters daily;**
- **Road hasn't been upgraded for many years;**
- **Came to be known as “road of death” due to many accidents that have claimed lives over the years;**
- **The high rate of accidents necessitated the urgency to upgrade the road;**
- **DoT transferred LP & MP road sections to SANRAL in July 2015 to do the upgrades;**
- **GP not transferred but SANRAL will manage the upgrade i.t.o. an agreement (November 2015);**
- **The upgraded road will not be tolled.**
- **Remains an important economic route connecting the 3 provinces.**

Proposed Intersection Upgrades

Roundabouts

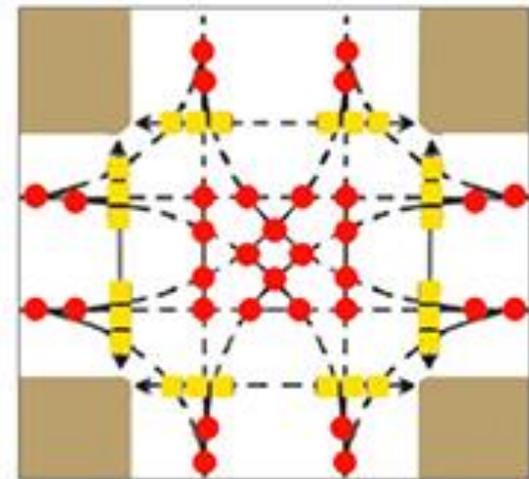

(Reduced Conflicts Points and Crash Severity)

Roundabout

● 8 Vehicle conflicts
■ 8 Pedestrian conflicts

Intersection

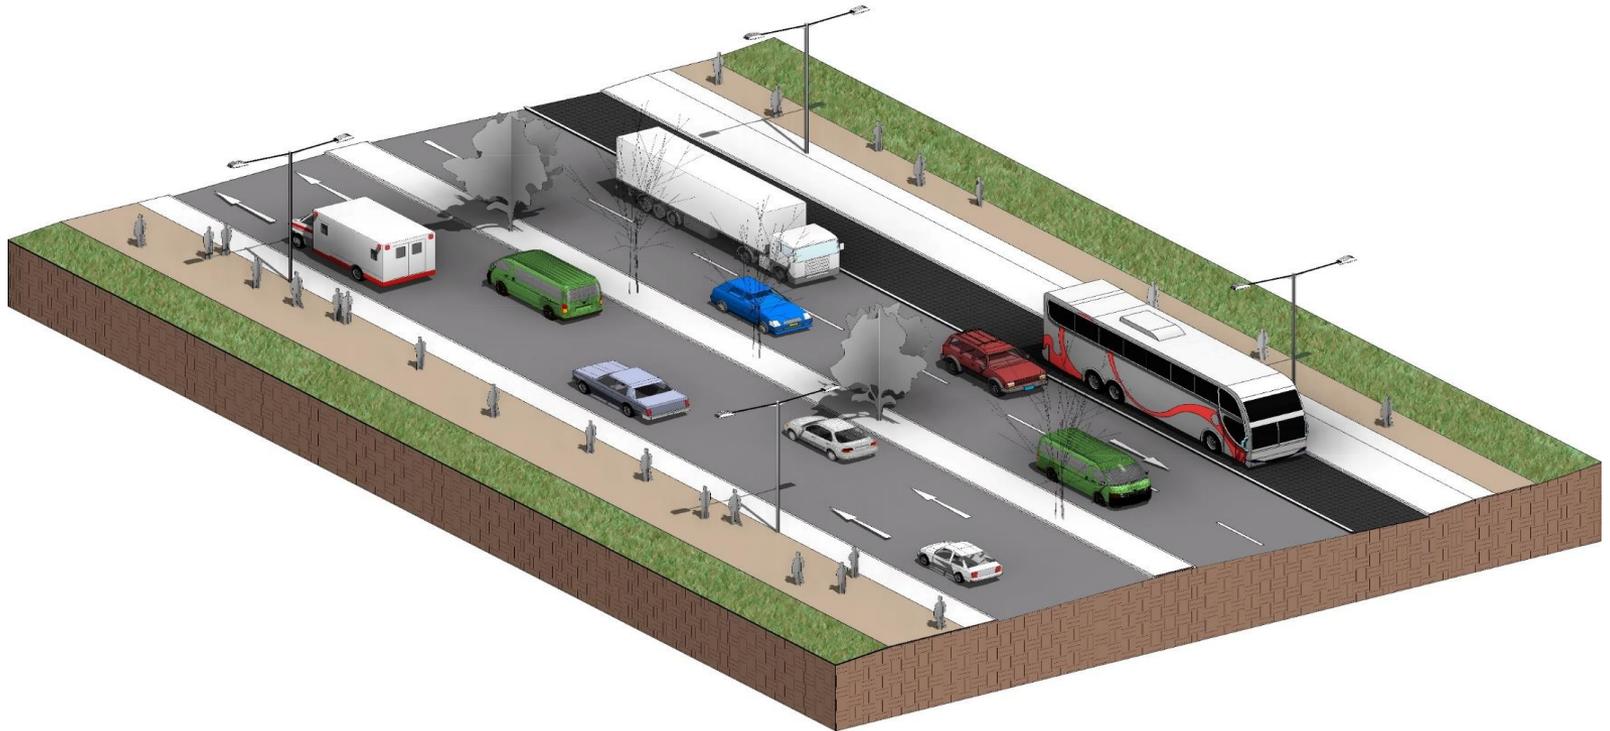

● 32 Vehicle conflicts
■ 24 Pedestrian conflicts

Improved intersections

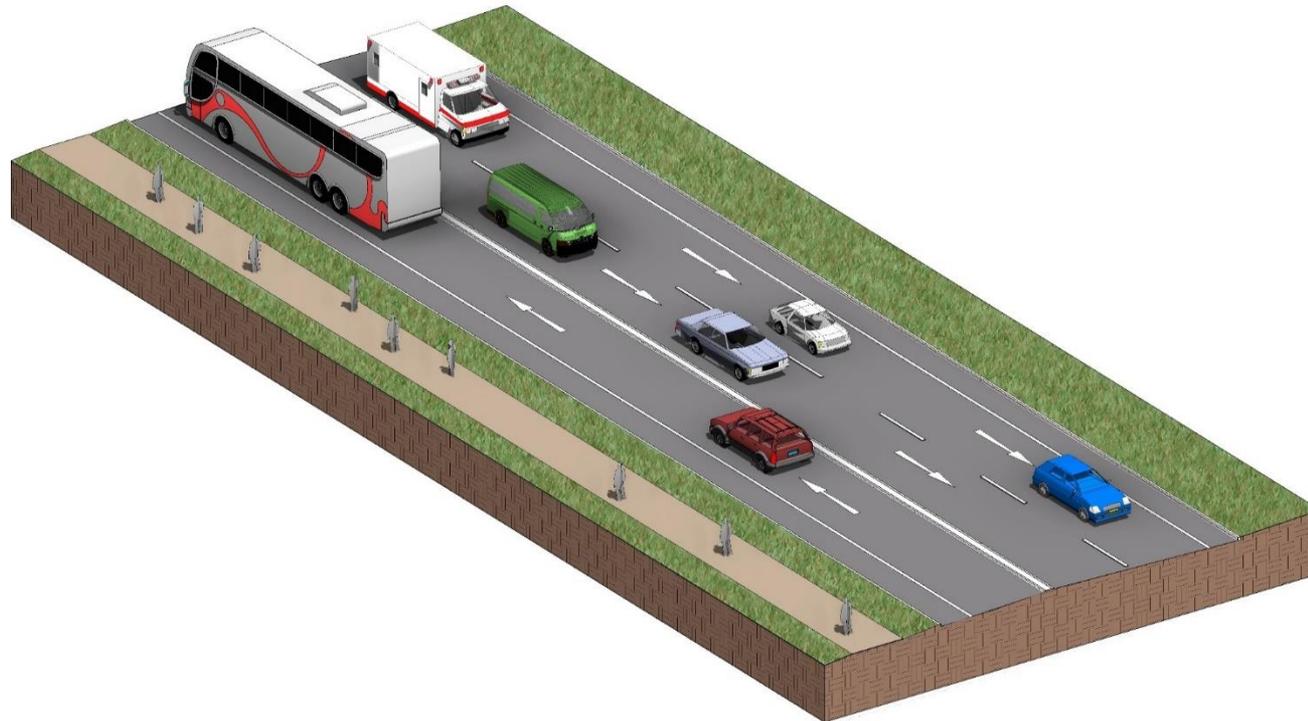

Proposed Cross Sections

Urban Sections: 2 lanes per direction + bus stop

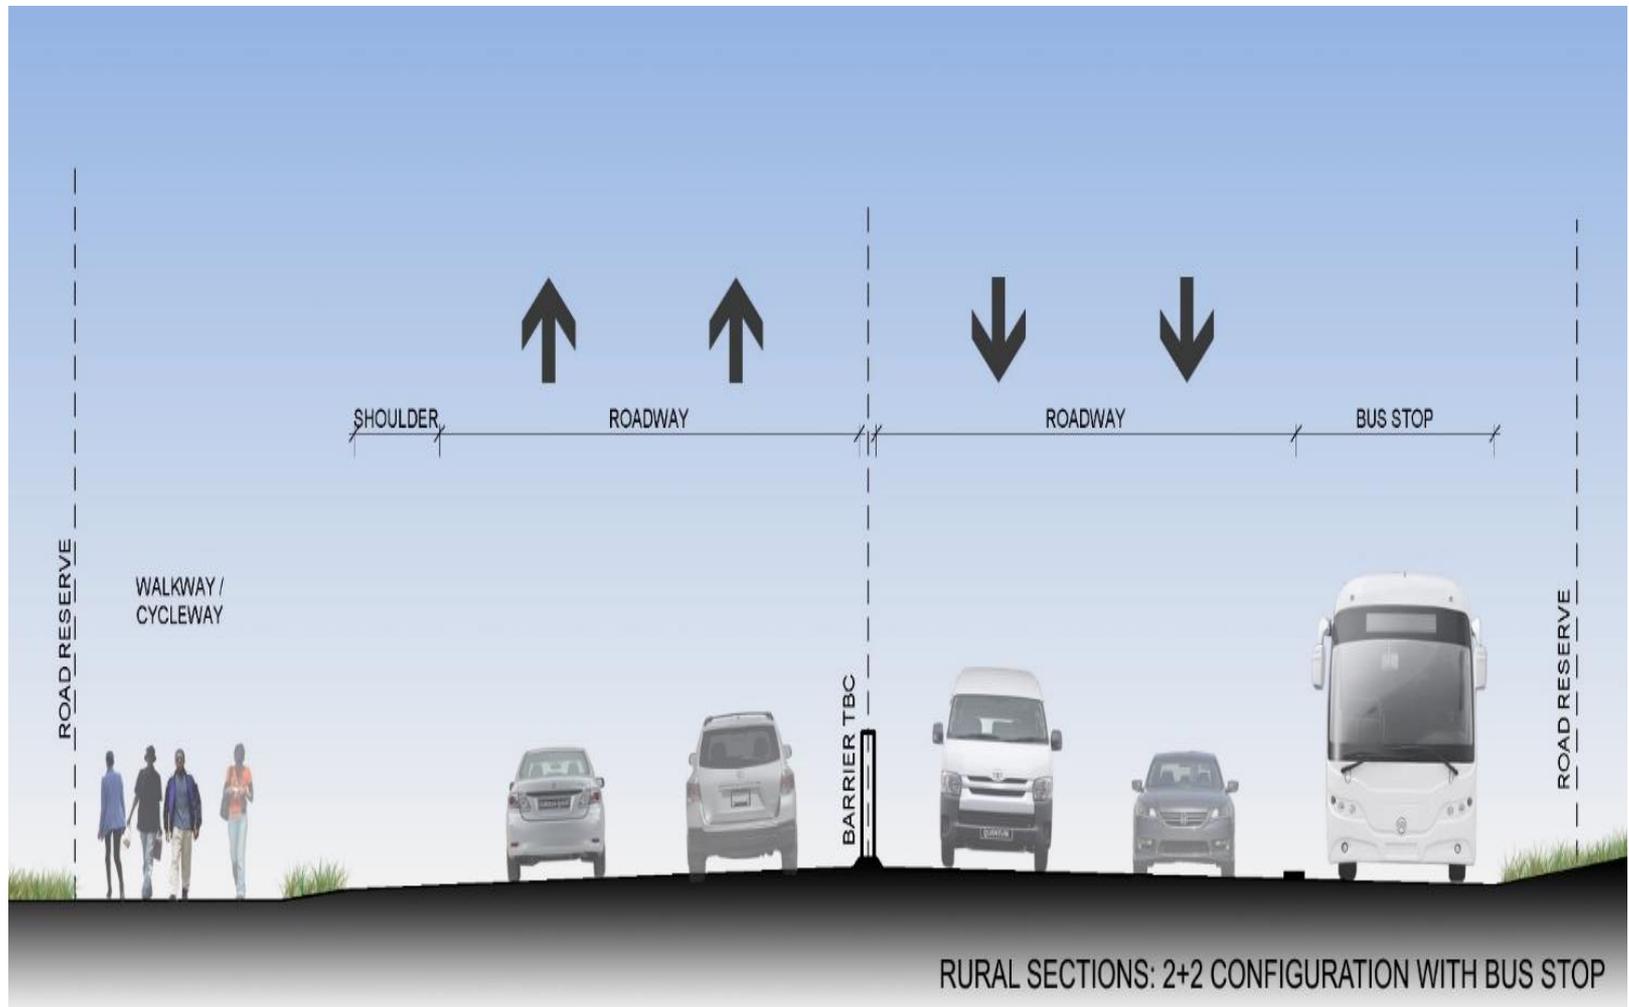

Proposed Cross Sections

- Rural Sections: 2 + 1 Configuration

Proposed Cross Sections

- Rural Sections: 2 + 2 Configuration + Bus Stop

Implementation Strategy

- Implement RRM, Conventional and Community Development projects.
- Implement projects in phases.
- Main contractors – structured JVs.
- Training of labourers and small contractor development.
- Maximise labour participation.
- Maximise small contractor participation, preferably from the target area.
- Ongoing stakeholder management.

Progress - 2016

- Consultants have been appointed for all three provinces (GP, MP & LP)
- **June 2016**
 - Sod turning by Minister of Transport
 - SMME Information session (Thembisile Hani, Ephraim Mogale & Elias Motswaledi LMs)
- **July 2016**
 - SMME Information session (Dr JS Moroka LM)
- Ongoing Stakeholder Engagements
- **November 2016**

Construction contracts awarded :

 - Upgrading of priority intersections in Mpumalanga Province: Raubex/ Moloto JV (Khuluphala, Themolo, Biz Afrika)
 - Upgrade of 22km road from south of Marble Hall: KPMM/ Chauke Business Enterprises JV
