

UPCOMING CONCRETE PAVEMENT EVENTS

12th International Conference on Concrete Pavements

- ISCP is partnering with SB2 to utilize their virtual campus named “The Aggregate” to host this major international conference
- This is an Avatar Based Platform

12th ICCP

- Delayed from last year
- Running from 27 September to 1 October
- 17h00 to around 22h00
- 96 paper presentations both live and recorded.
- 21 podium sessions
- 10 workshops.

12th ICCP Podium Sessions

- Airfields
- Moisture effects
- LCA
- Overlays Part 1
- Overlays Part 2
- Built and Novel Environment
- Geotechnical Aspects
- Long-Life Pavements
- Case Studies
- CRCP Case Studies
- Freeze-Thaw Durability
- Policy
- Optimization
- Sustainable Materials
- Specifications
- Modeling
- Joint Quality
- Pavement ME
- Precast and Rapid Construction
- Functional Evaluation
- RCC and Heavy Loads
- Thin Pavements
- Construction Practices
- Curing and Repair

12th ICCP Workshops

- Internal Curing for Concrete Paving (Sponsored by ESCSI)
- Design and Evaluation of Rigid Airfield Pavements (Sponsored by FAA)
- Fiber-Reinforced Concrete Materials for Pavements (Sponsored by FRCA)
- Pavement Resiliency (Sponsored by FHWA)
- Continuously Reinforced Concrete Pavements (Sponsored by CRSI)
- Performance-Engineered Mixtures (Sponsored by NCPTC)
- RCC Pavements Technology for Roads and Industrial Sites (Sponsored by RCC Pavement Council)
- Precast Concrete Pavement (Sponsored by NPCA)
- Design of Industrial Concrete Pavement Systems (Sponsored by PNA)
- Pavement Preservation (Sponsored by IGGA)

12th ICCP

- Registration is US\$80 for first 1000 delegates and US\$120 thereafter
- <https://12thiccp.concretepavements.org/register>

13th ICCP

- ISCP will be hosting the **13th ICCP** in-person in Minneapolis, Minnesota, USA at the [Depot](#) from August 25-29, 2024.

Roads 2022
Krakow

14TH INTERNATIONAL SYMPOSIUM ON CONCRETE ROADS

Concrete Roads to the Green World

19-23 JUNE 2022, KRAKOW

14th International Symposium on Concrete Roads postponed to 25-29 June 2023!

**The new deadline to submit your abstract
is *15 February 2022.***

CONCRETEFiX Season 2 – Episode 6

PERFORMANCE ENGINEERED MIXTURES – NOT JUST AN AMERICAN GIMMICK

by Dr Peter Taylor from Iowa State University, USA

This presentation will describe the history and aim of the PEM programme for pavements and structures, the philosophy behind using tests that measure the things that really matter, and how we are adjusting mixtures to meet performance needs while improving sustainability. We will look at how it is being implemented across the USA, and what the next steps are, including how we can extend it beyond the point of delivery to include impacts that construction activities can have on mixture performance.

Tuesday, 21 September 2021
via Zoom @ 15:00

Attendance Free
